## Uses

Treatment of eczema that is at risk of becoming infected.

## Format and Ingredients

Bath additive containing:

Light Liquid Paraffin 52.5% w/w, Benzalkonium Chloride 50%  
Solution 6% w/w, Triclosan 2% w/w,

## Dosage

Always dilute with water before use. Use once daily, do not exceed the recommended amount. Adults, elderly and children over 2 years: in an 8 inch (20cm) bath, add 2 capfuls (20ml). To a 4 inch (10cm) bath, add 1 capful (10ml). Infants over 6 months: add 1ml (just enough to cover the bottom of the cap) to a baby bath containing approximately 15 litres of water and mix well. Soak the affect areas of skin for 10-15 minutes. Gently pat dry. Not recommended for babies less than 6 months.
